

FINAL DRIVES

Your Solutions Provider for Final Drives

Our H&R brand final drives and reconditioned OEM final drives are high-quality alternatives to expensive OEM parts. Our final drives are manufactured to meet or exceed OEM specifications. With our ability to support over 5,900 excavator and bulldozer models, we offer the largest selection of new and reconditioned final drives and their parts in North America.

Whether you opt for our new H&R brand final drive or our reconditioned OEM final drive, we can help save you 20-70% off of the OEM dealer pricing. We are your solutions provider for both excavator final drives and bulldozer final drives.

Warranties on final drives are two years for new H&R brand final drives and six months for reconditioned final drives.

The H&R Difference

- H&R brand final drives are designed to fit your machine without modification — no need to worry about measurements, bolt patterns, or fittings.
- Support for over 5,900 models of excavator, compact track loader, scrap handling, and forestry equipment from 1 to 50 tons making us the largest supplier in North America.
- We offer new and reconditioned complete units, as well as final drive components, allowing the flexibility you need to complete your job as efficiently and economically as possible.
- Fast, same-day shipping from our locations.

ABOUT H&R

Locations to Serve You

We have the ability to get your products where you need them, fast and at a reduced cost.

Massive Inventory
