

SLEWING RINGS

Our OEM slewing rings provide the reliability you require, at a price well below OEM prices. You will be hard-pressed to find a better alternative for your machine.

New H&R Brand slewing rings (ring gear, ring bearing, slewing ring bearing, swing bearing, turntable bearing) are available for a wide variety of different manufacturers and machines.

Our H&R brand replacement slewing rings are known for their reliability, quality, and the savings they offer over OEM parts.

Excellent Warranty. Satisfaction Guaranteed.

- H&R Has Partnered With A Major Manufacturer To Supply Our Own Line Of H&R Brand Slewing Rings.
- This offers our customers an alternative to expensive OEM parts, while still meeting or exceeding OEM specifications. These H&R brand slewing rings come with an **excellent warranty and your satisfaction is guaranteed.**
- Produced for H&R by one of the world's leading manufacturers to meet or exceed OEM specifications.
- Advanced production technology utilizing CNC lathes, grinding, machining, cutting, and quenching processes.
- Specifically designed for heavy duty application requiring high capacity for axial, radial forces, and tilting loads.
- Solutions for all major manufacturers supporting 3.5 to 150 ton excavators in every application.
- **Backed by a 1-year warranty.**
