

## TRANSMISSIONS

### Why Choose **H&R Certified Rebuilt Transmissions**?

With H&R, you get the **reliability**, **durability**, and **performance** you demand from a premium part. And with **our solid one-year warranty**, your risk is virtually eliminated.

#### The Process

Our proven rebuild process ensures every part of the transmission is inspected and passes quality control standards. If it does not meet OEM reusability specifications, it is replaced.

#### Disassembly

We disassemble the entire transmission down to the nuts and bolts and clean and prepare the parts for inspection.

#### Inspection/Evaluation

We inspect every part of the component and test parts when able, removing those that do not meet OEM reusability guidelines.

#### Replacement Parts

We use the highest quality replacement parts available for all H&R Certified Rebuilt Transmissions, guaranteeing that the final product meets our strict standards.

#### Transmission Reassembly

Our highly-skilled technicians have the tools and training to make sure that every transmission is properly reassembled.

#### Officially Certified Rebuilt

Once the transmission passes all tests and inspections, it is marked as H&R Certified Rebuilt.

#### Warranty

We place a solid one-year warranty on our H&R Certified Rebuilt transmissions, ensuring our commitment to you well after your purchase.

## ABOUT H&R

### Locations to Serve You

Get your products where you need them, fast and at a reduced cost.
