YOUR ALTERNATIVE PARTS SOLUTION PROVIDER

Final Drives

After disassembling the travel motor from the gearbox, we inspect all the internal parts of the gearbox and replace them as needed. The travel motor and gearbox are resealed and tested to make sure they meet or exceed OEM specifications.

Available:

New Aftermarket
Reconditioned

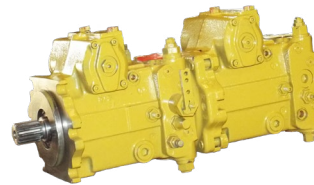

Swing Drives

The swing motor is removed from the planetary assembly where we inspect all the internal parts and replace them as needed. We reassemble and seal the swing drive and test it to make sure it meets or exceeds OEM specifications.

Available:

New Aftermarket
Reconditioned

Hydraulic Pumps & Motors

Rebuilt pumps are completely disassembled, cleaned, inspected, and worn parts replaced. They are resealed and flow tested to assure they meet or exceed OEM specifications.

Available:

New Aftermarket
Rebuilt
Good Used

Track Spring Assemblies

Rebuilt track adjuster spring assemblies are inspected, and barrel is honed if needed. All seals and fittings are replaced. Aftermarket assemblies are OEM quality.

Available:

New Aftermarket
Reconditioned
Good Used

Transmissions

Transmissions are completely disassembled, all parts are cleaned, inspected, and replaced if needed. Transmission is tested on stand to meet or exceed OEM specifications.

Available:

H&R Certified Rebuilt
Good Used

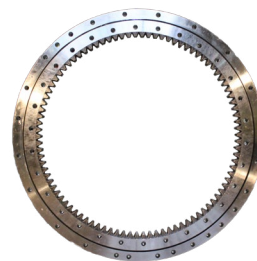

Small Gear Pumps & Valves

Gear pumps are opened and inspected, parts replaced as needed, and function tested to insure operation.

Available:

Reconditioned
Good Used

Slewing Rings

Our H&R brand replacement slewing rings are known for their reliability, quality, and the savings they offer over OEM parts.

Available:

New Aftermarket

Hydraulic Control Valves

Hydraulic control valves are sold as complete assemblies. Rebuilt valves have the seals replaced as needed. All valves are tested to meet or exceed OEM standards.

Available:

Rebuilt
Reconditioned
Good Used

YOUR ALTERNATIVE PARTS SOLUTION PROVIDER

Hydraulic Cylinders

Rebuilt cylinders are completely disassembled, cleaned, inspected, and worn parts replaced. The barrels are honed and rods are re-chromed and re-sealed, as needed. They are resealed and tested to meet or exceed OEM specifications.

Available:

Rebuilt
Good Used
Select New OEM

Differential Assemblies

Reconditioned differentials are completely disassembled. All parts are cleaned, inspected, and replaced, if needed. The ring and pinion are guaranteed.

Available:

Reconditioned
Good Used

Engines

Engines are visually inspected and cleaned.

Available:

Good Used

Axle Assemblies

Axle assemblies are completely disassembled and all parts are cleaned, inspected, and necessary parts are replaced to ensure factory specifications.

Available:

Reconditioned
Good Used

OUR WARRANTY PROGRAM

H&R Construction Equipment Parts products are warranted to the original owner against defects in materials and workmanship based on the condition of the product when it was sold.

WARRANTY PERIODS

Unless otherwise represented, warranty periods from the date of purchase are as follows:

H&R Brand Final Drives	2 years
Rebuilt Components	1 year
Reconditioned Parts	6 months
Good Used Inspected	30 days
Core	not covered by warranty
Sourced Parts	that of the vendor

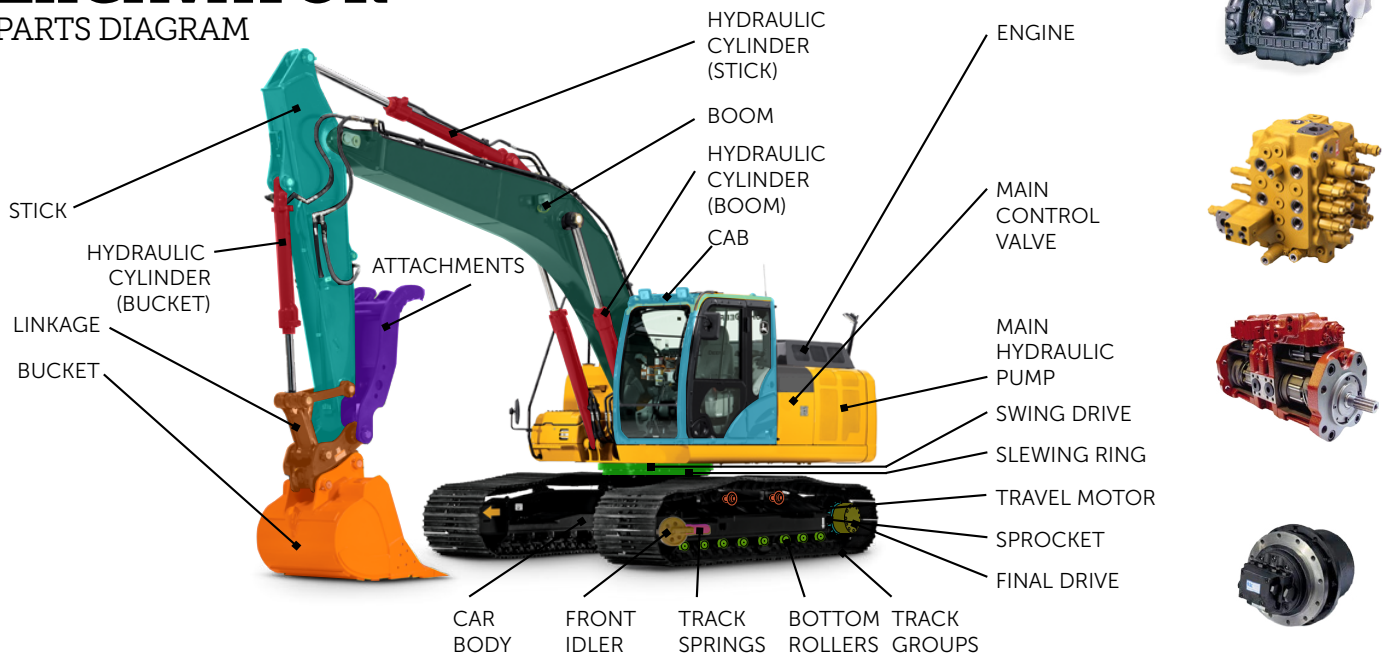

"Started dealing with this company back in the early 1990's, excellent service, the people are knowledgeable, and helpful. They also have competitive pricing and great shipping on used and new items, plus they are always adding new products and availability."

– Kenneth Patterson

PARTS ON THE SHELF. READY TO SHIP!

INNOVATORS OF THE “UPFRONT PROCESS”

In 1999, H&R changed the way alternative parts were supplied. Moving from the traditional “pull & check” model, the newly conceived “ready to ship” model was branded the Upfront Process. H&R uses this same model today.

Machines are identified as “high demand” machines and brought into the Teardown Department to be completely dismantled. The machine’s parts are identified, inspected, and the parts that pass inspection are sent to be processed.

Processing includes being cleaned, inspected again and either put on the shelf for sale, or sent to the Recondition Shop. There, the parts are inspected and tagged to be reconditioned or rebuilt.

Our mechanics recondition or rebuild the part, then test it to make sure it functions within or above manufacturers’ specifications, after which the part is ready to be placed on the shelf and available for sale.

A sold part is moved to the shipping department to be inspected a final time and prepared for shipping. This Upfront Process has effectively streamlined parts processing, increases the quality of the parts sold, and improves customer service by significantly decreasing or eliminating the lead time for parts by creating ready-to-ship parts.

H&R products are available through a number of OEM distributors across North America.

Because of their partnership with H&R, OEM distributors have access to our inventory through local dealers and benefit from our competitive prices, swift shipping, and proven part quality.

Be sure your dealer is quoting H&R for alternative parts the next time you have your machine in for repair and know that you're getting the best part at the best price.
