

# Recoil Springs

## Plug & Play Recoil Springs

### WHY H&R?

#### Four Locations to Serve You

With locations across the United States, we can minimize downtime with same day shipping and reduced transit time.

#### Massive Inventory

With hundreds of recoil springs ready to ship, we're the largest supplier in North America and a trusted source in the industry.

#### Parts Specialists

Over 15 highly-trained Parts Specialists to help work with you in supplying the parts you need to get you back up and running fast.

### H&R DIFFERENCE

- Maintaining proper track tension is a critical factor affecting undercarriage lifespan and machine performance. Broken recoil springs or poorly functioning adjusters will shorten track chain life, reduce the ability to absorb shock and maintain control of the track system
- Recoil spring assemblies consists of a recoil spring, grease cylinder and idler yoke if applicable
- Factory assembled and calibrated to ensure correct preload tension
- All spring assemblies are designed to meet or exceed OEM specifications and tested to ensure correct fitment and performance
- Supporting all major manufactures from 12 to 100 ton excavators and dozers in all applications
- Backed by a 1 year warranty
